Your Internet and voice service are the lifeblood of your business. That's why we give you everything you need to take advantage of our Ethernet-based Internet Voice Bundle.

### Bundled convenience

The Lightpath Internet Voice Bundle provides your business with high-speed Internet access, voice access, Minutes-of-Use for your local, regional and long distance needs, and a comprehensive set of additional features. Below is just a sample of what you will get:

INTERNET FEATURES	VOICE FEATURES
Dedicated Internet access speeds from 10 Mb to 1000 Mb	Minutes-of-use packages from 10,000 to 1,000,000 minutes
Managed Cisco Router (available for most speeds)	Voice Handoffs available as PRI, T-1, business lines or SIP Trunks
IP allocation	Caller ID and DID (Direct Inward Dialing)
E-mail (optional-additional fee)	Additional features available such as Voicemail and Toll Free

### Delivering more for less

An allowance of minutes – which means a lower cost per employee per month!

### The right fit for your business

With a variety of bandwidth, from 10Mb to 1000Mb and minutes-of-use (from 10,000 to 1,000,000) options, Lightpath is sized to fit your business. And, you can often add bandwidth or minutes with a simple phone call.

### Take control of your voice services

- A dedicated PBX CommPortal allows easy management of SIP Trunk, SIP PRI, or TDM PRI services
- Be prepared for the unexpected and stay connected with customers, vendors and employees using **Immediate Call Forwarding** or **Unavailable Call Forwarding** to direct calls to an alternative number
- Easily accessible through any web enabled device, including tablets and smartphones
